Q&A
IMMEDIATE GLOBAL FUND FUNDING OF UP TO US$1 BILLION

Under the World Health Organization’s guidance, the Global Fund is using its experience working with partners and governments in more than 100 countries to coordinate our response on a massive global scale. The Global Fund’s response to the pandemic makes available up to US$1 billion through grant flexibilities and the COVID-19 Response Mechanism.

GRANT FLEXIBILITIES

In early March 2020, the Global Fund enabled countries to use up to US$500 million in grant flexibilities to rapidly adapt existing programs, purchase protective equipment, diagnostics and medical supplies, and to deploy prevention campaigns.

Over $172 million approved to 91 countries and 8 regional grants through grant flexibilities.

COVID-19 RESPONSE MECHANISM

In April, the Global Fund took a further step by launching the COVID-19 Response Mechanism with an initial capacity of an additional US$500 million.

As of 30 June, US$197 million in immediate funding has been approved for 43 countries and 3 multi-country programs through the COVID-19 Response Mechanism.

Source: Situation Report of 30 June 2020; Situation Reports are issued to provide weekly updates.
ON THE FRONT LINES: RESPONDING TO COVID-19

PROTECTING MOTHERS AND BABIES FROM HIV DURING THE COVID-19 PANDEMIC IN NORTHERN UGANDA

The COVID-19 lockdowns are making it difficult for vulnerable people to access critical health services, particularly in remote communities. In northern Uganda, the lockdown and restrictions on transport is a barrier to the access to health services for mothers and pregnant women living with HIV, putting them and their babies at risk.

In support of Uganda’s National COVID Preparedness Response Plan, the Global Fund is providing US$4,452,205 to fight COVID-19, shore up critical health systems, and ensure lifesaving HIV, TB and malaria programs continue. As part of the initial response, the Ugandan Ministry of Health has prioritized the purchase of personal protective equipment for health workers and diagnostic tests for COVID-19. Additionally, the Global Fund is coordinating through our main civil society organization partner to strengthen differentiated service delivery models for key populations and people living with HIV in Uganda.
ON THE FRONT LINES: RESPONDING TO COVID-19

COUNTRY HIGHLIGHTS

**Benin** modified its mosquito net distribution campaign to be consistent with social distancing, mobilizing 5,500 community health workers to go door to door to distribute more than 8 million mosquito nets across the country in 20 days.

**Honduras** is mitigating impact on malaria programs and fighting COVID-19 by purchasing 25,000 surgical masks and 5,000 N95 respirator masks and by utilizing four ventilators and a mobile X-ray machine.

**Indonesia** is purchasing masks and other personal protection equipment for front-line health workers, improving lab testing, and repurposing molecular-based technology for TB to also test for COVID-19.

**Kenya**: CHW who regularly provide testing, tracing and care for diseases like malaria and TB are training to adapt their skills to also test, trace and isolate for COVID-19. The community health workers provide surveillance for new COVID-19 infections. As the cases of the pandemic increase, Kenya has also turned to the community health workers to support homebased isolation and care for people infected with COVID-19.

For an up-to-date list of countries accessing Global Fund support to fight COVID-19 and more stories, visit [https://www.theglobalfund.org/en/covid-19/](https://www.theglobalfund.org/en/covid-19/)

OUTREACH STRATEGY & PLANS

Q&A
COVID-19 URGENT MITIGATION PLAN

1. EXECUTIVE SUMMARY

2. COVID-19 THREATENS PROGRESS IN THE FIGHT AGAINST HIV, TB AND MALARIA

4. TO PLAY ITS PART IN THE RESPONSE TO COVID-19, THE GLOBAL FUND WOULD NEED AN ADDITIONAL US$5 BILLION

5. THE GLOBAL FUND IS A PROVEN MODEL TO FIGHT INFECTIOUS DISEASE AND SAVE LIVES

6. CONCLUSION: WE MUST UNITE TO FIGHT
The stakes are extraordinarily high across all three diseases. New modelling studies by WHO, UNAIDS and the Stop TB Partnership show that if health systems collapse or treatment and prevention services are interrupted, the death toll from HIV, TB, malaria and other diseases could exceed deaths from COVID-19 itself. In 2020 alone, more than 1.4 million additional people could die from HIV, TB and malaria as a knock-on or indirect consequence of the COVID-19 pandemic.
COVID-19 THREATENS PROGRESS IN THE FIGHT AGAINST HIV, TB AND MALARIA

We are already witnessing the impact of COVID-19 on the fight against HIV, TB and malaria across the countries where the Global Fund invests. The latest survey results of Global Fund-supported programs across 106 countries show widespread disruptions to HIV, TB and malaria work as a result of the COVID-19 pandemic, impacting approximately three-quarters of HIV, TB and malaria programs.

Key results from the latest survey, completed 1 June:
Disruption in Health Service Delivery
THE GLOBAL FUND’S ROLE IN THE GLOBAL RESPONSE

1. OUR MISSION & MANDATE
   Safeguard the gains in the fight against AIDS, TB and malaria, protect frontline healthcare workers as well as the broader achievements in health and support to health systems.

2. OUR EXPERIENCE, CAPABILITIES & PARTNERSHIP MODEL
   Leverage our experience in fighting pandemics, lend our capabilities in procurement & supply operations, & mobilize our partnership model to support the global COVID-19 response.
THE GLOBAL FUND’S ROLE IN THE GLOBAL RESPONSE

Given its role as the world’s largest multilateral provider of grants for global health and its focus on fighting infectious diseases and strengthening health systems, the Global Fund is uniquely positioned to help countries respond to the COVID-19 pandemic and mitigate the knock-on impact on HIV, TB and malaria. In alignment with WHO’s overall leadership and coordination of the global COVID-19 response, the Global Fund’s has adopted a four-pronged response to the pandemic:

1. Adapt HIV, TB and malaria programs to mitigate the impact of COVID-19 and safeguard progress;

2. Protect health workers through the provision of personal protective equipment (PPE) and training to front-line health staff, including community health workers;

3. Reinforce systems for health so they don’t collapse by supporting urgent enhancements, including to supply chains, laboratory networks and community-led response systems;

4. Fight COVID-19 by supporting control and containment interventions, including testing, tracing and the support of isolation, communications and treatment (as therapeutics become available).
THE GLOBAL FUND’S ROLE IN THE GLOBAL RESPONSE - ACCESS TO COVID-19 TOOLS ACCELERATOR

Facilitation group to oversee and report progress, mobilise resources and engage with stakeholders
Public sector and private not-for-profit partners, such as:
- EU, Canada, France, Germany, Italy, Japan, Norway, Spain, UK
- BMGF, WEF, Wellcome Trust, coordination hub from WHO

As part of ACT-A, the Global Fund is the co-convener of both the Diagnostics Partnership (with FIND) and the Health Systems Connector (with the World Bank).

The Global Fund is a workstream co-lead for procurement and deployment in the Therapeutics Partnership.
TO PLAY ITS PART IN THE RESPONSE TO COVID-19, THE GLOBAL FUND WOULD NEED AN ADDITIONAL US$5 BILLION FOR THE NEXT 12 MONTHS

To mitigate the impact of COVID-19 on the countries most affected by HIV, TB and malaria, sustain momentum in the fight against the 3 diseases and save millions of lives, the Global Fund would need at least US$5 billion for the next 12 months.

Of this figure, 62% relates directly to mitigating the impact on HIV, TB and malaria, while 38% relates purely to helping countries respond effectively to COVID-19. Both are necessary to prevent COVID-19 from reversing our gains on HIV, TB and malaria and undermining our progress towards ending the epidemics.

Reinforce Systems for Health
US$0.9 billion

COVID-19 Therapeutics
US$0.4 billion
THE GLOBAL FUND IS A PROVEN MODEL TO FIGHT INFECTIOUS DISEASE AND SAVE LIVES

As the world responds to COVID-19, we must adapt and leverage the strengths of the Global Fund, both to fight COVID-19 itself, and to mitigate the impact on HIV, TB and malaria. These strengths include:

1. Building resilient and sustainable systems for health
2. Community engagement
3. Fighting human rights and gender barriers to health
4. Private sector engagement
5. Effective procurement systems and economies of scale
6. Supply chain and logistics
7. Rigorous monitoring and well-established systems
8. Dedicated COVID-19 rapid response mechanism
CONCLUSION: WE MUST UNITE TO FIGHT

Mitigating the impact of COVID-19 on the countries most affected by HIV, TB and malaria will require swift action, extraordinary levels of leadership and collaboration, and significant extra resources. We must recognize that this is not just a fight against a single virus, but a fight to protect and save lives from multiple infectious diseases. We must fight this new fight, and we must sustain the unfinished fight against HIV, TB and malaria. Saving people from dying from one infectious disease simply to have them die of another is not the result we want. Our goal must be to mitigate the total impact of COVID-19, including both the direct effects of the virus, and the knock-on impact on other diseases. Moreover, as in the fight against HIV, TB and malaria, in the fight against COVID-19, we must leave no one behind.

RESOURCES

• The estimated resource need covers over 120 Global Fund implementing countries for the next 12 months

• It is built on the ACT-A investment cases as well as country demand for support through the Global Fund’s COVID-19 Resource Mechanism, with the demand derived from national COVID-19 response plans

• The Global Fund’s share of the resource need is generally commensurate to its share of total financing for HIV, TB and malaria

• Adapt HIV, TB and malaria programs and Reinforce systems for health: incremental amount needed in addition to total financing available, based on C19RM funding requests received to date, where the amounts are adjusted upwards to account for the fact that the demand is constrained by the current $500m envelope.

• Protect front-line health workers: estimated cost of PPE per day for core health personnel, community health workers and lab technicians.

• Fight COVID-19: subset of the procurement/deployment need from the ACT-A Diagnostics and Therapeutics investment cases to apply to Global Fund implementing countries only. For diagnostics, the need also includes country preparedness.

**Outcome:** Overall, $6.9 Billion pledged, of which:
- $1.5 Billion In Cash Grants,
- $5.4 Billion In Loans And Guarantees

**Global Fund-related announcements:**
- **FIFA Foundation:** US$ 1.5 million, matched 1 to 1 by anonymous donor & committed to support the Global Fund’s COVID-19 response, marking the start of a longer-term partnership
- **Germany:** € 150 million for the Global Fund’s COVID-19 Response Mechanism
OTHER KEY OUTCOMES OF EC PLEDGING SUMMIT

• ‘Global Goal: Unite for our Future’ 27 June Summit brought an additional €6.15 billion of funding, bringing the total pledged under the initiative since 4 May to almost €16 billion.

• G7/EC announced major commitments while others announced relatively smaller pledges, but it continues to be challenging to track new vs repurposed & intended recipients of pledges based on announcements alone, some «unallocated» pledges

• A significant number of corporations & private foundations also announced commitments

• The Vx Partnership continued to be the focus of attention, compared to the other Partnerships

• Still unclear whether there will be another pledging opportunity & what the next steps are following the Summit
DONOR OUTREACH & ENGAGEMENT OBJECTIVES

OBJECTIVE 1
P&C risk mitigation: Maintain/nurture relationship, convert pledge & position GF well for 7th Repl.

OBJECTIVE 2
Resource mobilization: Leverage strategic partnership, global political leadership &/or funding opportunities for C19RM

OBJECTIVE 3
Operations: Leverage key role in production & distribution of health commodities, & in influencing / demonstrating GF’s ability to deliver effective response.
IN THE CURRENT CONTEXT, WHAT ARE THE OPPORTUNITIES?

The unprecedented level of attention & interest in global health can be leveraged to:

- Appeal for global solidarity to address direct & knock on impact of COVID-19
- Demonstrate the importance of international cooperation by participating in & contributing to success of global initiatives (e.g. ACT Accelerator)
- Shape the post-COVID-19 phase of global health & approach to global health security

There are potential ‘pots’ of additional funds:

- Underutilized ODA budget
- Re-orientation of TA set-asides
- Health ministries’ budgets
- Supplementary budgets
- FTT
- Blended & other IF mechanisms
- Debt relief

*Global Fund Partnership Forums likely postponed to Q1 2021.*
**NEXT STEPS**

- Briefings to advocacy partners & key stakeholders
- Continue to support CS/communities engagement in GF response & ACT-A
- Accelerate mobilization and communications on GF Urgent Mitigation Plan & the ACT-A Partnerships, including Dx & Tx IC
- Roll-out & leverage up-coming platforms for advocacy & engagement
