

the gfan network in 2021-2025

GFAN is a global network of advocates and advocacy organizations working to unite voices and efforts worldwide for fully funded and effective efforts against epidemics of HIV, tuberculosis and malaria and for attainment of health, human rights, and sustainable development.

- GFAN’s network includes global advocacy organizations, regional advocacy networks, individual activists, and other partners.
- More than 650 individuals at more than 350 organizations in 90 countries currently receive information from GFAN and work in aligned ways to support a fully funded and effective Global Fund.

GFAN is a diverse and dynamic movement, inviting and facilitating the participation and leadership of hundreds of activists through sharing of information, trainings and meetings, and collaborative policy work and advocacy.

Partners in gfan

During 2021-2025, GFAN will remain an open, adaptable and accountable network.

GFAN will work with and support all partner organizations and activists, and actively seek to develop new partnerships and new activist resources to address epidemics and advance health, rights and development in all regions of the world.
